Skills

Languages
C, C++, Java, JavaScript, Python, SQL, R

Data
SQL database design and management, statistical modelling in R and RStudio

Practice
Software Development Lifecycle, designing and packaging software, algorithms and data structures

Hands-on
Building and repairing small electrical appliances, graphic design

Education

BSc, Computer Science (Major), Statistics (Minor)
University of Manitoba, 2025

Awards

Riel-Evate Scholarship, Dakota Collegiate (2020)

Highest standing in Electronics, Mathematics and Science (2020)

Academic Excellence Award, six subjects (2020)

Summary

Computer Science graduate with eight years of programming experience in C, C++, Java, JavaScript and Python. Focused on low-level and systems work, with a hands-on background in electronics and appliance repair. Dependable, quick to learn, and used to working a demanding schedule.

Projects

[Keep only the projects Evan has finished, with GitHub links, before sending.]

Custom memory allocator — C, Linux

- Wrote malloc and free from scratch with a free list, block splitting and coalescing
- Tested for leaks and invalid memory access

Unix shell — C, POSIX

- Built a shell with pipes, redirection, background jobs and signal handling

Hosted web app — [Stack], Render

- [What the app does and who it is for], deployed from GitHub to Render

Experience

Summer Labourer — 2026
City of Winnipeg Parks & Open Space

- Worked a non-standard schedule (10am to 6pm, Thursday to Monday) with consistent attendance
- Trained on and operated an Outfront mower, UTV and dump truck
- Dealt directly with the public while carrying out grounds work

Student Labourer — 2022
City of Winnipeg Parks & Open Space

Volunteer work and activities

- Sleep In Heavenly Peace, bed building (2025)
- Career Trek, mentor teaching children teamwork, communication and leadership (2017, 2018)
- Christmas Hamper Drive (2016 to 2020)
- CSSA Game Jam participant (2023)
